English	FLUENT

CERTIFICATION

IN PROGRESS

Advanced Diploma in Software Engineering — APTECH

CONCURRENT

Undergraduate study, online university

I. PROFESSIONAL SUMMARY

Mid-level Software Developer and UI/UX Designer who solves real user problems through disciplined design and efficient code. Across more than three years I have shipped products that balance technical performance against exceptional user experience, carrying work from wireframe to deployed interface — consistently, independently, and fully remote.

II. PROFESSIONAL EXPERIENCE

Web Developer & UI/UX Designer

2022 — PRESENT

INDEPENDENT PRACTICE · REMOTE

- Designed and developed bespoke websites and web applications for clients across several industries, delivering responsive, accessible interfaces on agreed timelines.
- Produced end-to-end UI/UX work — wireframes, interactive prototypes, and finished production interfaces — ensuring each product was visually considered and intuitive in use.
- Managed client relationships unsupervised: gathering requirements, presenting design rationale, and iterating on structured feedback to meet commercial objectives.
- Sustained a fully remote workflow across concurrent engagements, demonstrating self-direction, written communication, and disciplined time management.

III. INSTRUMENTS & PLATFORMS

LANGUAGES	JavaScript, Python, Golang, Solidity, C, HTML, CSS
FRAMEWORKS	React.js, Node.js
DESIGN	Figma, wireframing, prototyping, responsive systems
PLATFORM	Docker, AWS Cloud, Vercel, Netlify, Render, Git, GitHub, Visual Studio Code

IV. EDUCATION

Advanced Diploma in Software Engineering (ADSE)

APTECH COMPUTER EDUCATION

2026 — 2028
